Detailed scenario and COF courtesy of Steve Spearman

Two hombres drive up, almost into your camp, and get out, asking if you know where they can buy some beer. They are squirrely looking characters. The hair on the back of your neck is tingling. You reply, the closest place is probably the store at Woods Canyon Lake. They don't look very smart, but no doubt realize the store will be closed long before they get there.

You position yourself between them and family, and motion for family to get behind you and leave. Suddenly, one displays a fixed blade Kabar type knife. He asks: "Where is everyone going? Do you have any beer?"

You point at the ice chest, say right there, and exit stage left (toward family). Moving fast and covering ground, you put eyes on family members, and note the knife guy is closing. Knife guy's partner has a pistol in hand.

You take cover behind pine tree, wave family to take cover, and engage closest threat, the knife guy, at 10 yards, with two to the body one to the head. Partner at 20 yards, has opened fire. Engage with three rounds. Now at 15 yards, partner is moving and shooting. Engage again, three rounds. Threat moves to 10 yards engage with three more rounds. Threats are down, move toward family to ensure their safety.
